REZONING REQUEST CONSIDERATIONS OF FINDINGS AND FACTS

1. Is the application consistent with the goals, policies and future land use map of the Master Plan? Have conditions changed significantly since the Master Plan was adopted with recent development trends in the area?

2. How are the site's physical and environmental features compatible with all of the uses permitted in the proposed zoning district? _____

3. What evidence is there to demonstrate the applicant cannot receive a reasonable return on investment through developing the property with at least one (1) of the uses permitted under current zoning?

4. Are all of potential uses allowed in the proposed district compatible with surrounding uses and zoning in terms of land suitability, impacts on the environment, density, nature of use, traffic impacts, aesthetics, infrastructure and potential influence on property values? _____

5. Will the requested change be a deterrent to the improvement or development of adjacent property in accord with existing regulations? _____

6. Is the infrastructure capacity and services adequate to accommodate the uses permitted in the requested zoning district without compromising public "health, safety, and welfare?"

7. Is there evidence of demand for additional land uses permitted in the requested zoning district in relationship to the amount of land currently zoned and available to meet the demand? _____

8. Will the requested change constitute a grant of special privilege to an individual as contrasted with the general welfare? _____

9. Can the site meet all of the dimensional standards for the zoning district? _____

10. If a rezoning is appropriate, is another zoning district more appropriate than the one requested? _____

11. Are there substantial reasons why the property cannot be used in accord with existing zoning?

12. Is it impossible to find adequate sites for proposed use in existing zoning districts permitting such use?
